

How to Stream Realtime to LiveLitigation

Instructions for setting up RealtimeCapture and streaming to an event.

1. Download and Install

1. Go to [LiveLitigation.com](https://www.livelitigation.com).
2. Click on **Downloads** in the navigation menu.
3. Download and install **RealtimeCapture**.

2. Protocol and COM Port Setup

1. Open RealtimeCapture and select either **Bridge** or **Caseview** as your protocol.
2. Ensure the verified **COM Port** is displayed (Default is usually `COM31`).
3. In your CAT Software, configure the realtime output to match this protocol and port.
 - Example: `Bridge @ 38400 baud on COM31`
 - Example: `Caseview @ 2400 baud on COM31`

4. Begin writing on your steno machine. You should see the **Bytes Received** value increasing in RealtimeCapture.

If the value is not increasing, please double-check your CAT software's COM port settings.

3. Connect to Event

To connect to the remote event:

- Enter the **Room ID** for the room you are streaming to.
- Click **Start** to begin streaming.
